The amendment filed 21 December 2004 has been received and entered. Claim 1 has been amended. Claims 1 is pending to which the following grounds of rejection are or remain applicable.

The rejection made in the paper mailed 21 September 2004 under 35 U.S.C. §102(a) over Chamberlain et al. is maintained and hereby repeated for the reasons set forth in the previous office action and those set forth below.

### ***Response to Arguments***

Applicants have amended claim 1 to recite that the methotrexate is administered locally to the back of the animal being treated. Upon review of the specification, page 5, line 28 reveals that locally means intrathecally. Since the method of administering an agent intrathecally is to administer into the subarachnoid or subdural space and Chamberlain et al. is administered intraventricularly, there appears to be an instance where an intraventricular administration can be administered into the ventricle of the brain that occupies the subarachnoid space. As such there appears to be overlap as to how the methotrexate is administered.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1614

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
